

GENERAL

The CentralLine Panel Bus I/O Modules communicate via the Panel Bus.

The pluggable CentralLine Panel Bus I/O modules consist of a terminal socket and a removable electronic module, allowing the socket to be mounted and wired before the electronic module is installed. All such electronic modules can be swapped out without disrupting the power and bus connections: Simply unplug the "old" and insert the "new" module.

WARNING

Risk of electric shock or equipment damage!

- ▶ Do not touch any live parts in the cabinet.
- ▶ Disconnect the power supply before you start to install the control system. More than one disconnect switch may be required to de-energize the system.
- ▶ Do not reconnect the power supply until you have completed the installation.
- ▶ Unused terminals must be closed (by completely screwing in the terminal screws), thus preventing the accidental touching of "live" parts.

The mixed CentralLine Panel Bus I/O modules offer a mix of 34 inputs and outputs in a compact housing. Software updates, configuration, and commissioning are all done automatically by the controller for all Panel Bus I/O Modules.

The Panel Bus I/O Modules are addressed manually by adjusting their HEX switches.

The Panel Bus I/O Modules may be used with any CPU supporting Panel Bus communication (e.g., the LION, EAGLE, etc.).

FEATURES

- Plug-and-play functionality for easy maintenance.
- Pluggable Panel Bus I/O modules can be exchanged without rewiring. Further, the separate installation of terminal sockets and electronic modules lower risk of damage and theft in the construction phase.
- Fast wiring with state-of-the-art push-in terminals (screw-type terminals also available) and bridge connectors.
- Wide range of sensors supported (NTC20k Ω , NTC10k Ω , PT1000-1/-2, Johnson A99 PTC, NI1000TK5000, PT3000, Balco500, 0/2...10 V, 0/4...20 mA). **NOTE:** The mixed Panel Bus I/O modules CLIOP830A and CLIOP831A feature inputs suitable for signals from NTC20k Ω sensors and 0/2...10 V, 0/4...20 mA, only!
- Binary input LEDs of the pluggable CentralLine Panel Bus I/O Modules can be configured for status display (off / yellow) or alarm display (green / red) per channel. **NOTE:** The mixed I/O modules CLIOP830A and CLIOP831A feature only non-configurable binary input LEDs!
- Configurable safety position for outputs, in case of loss of communication with the controller.
- Max. wiring flexibility due to optional accessories like auxiliary terminals and cross-connectors.
- Can be mounted in small installation housings
- Flexible mix of Panel Bus I/O modules covering all your application requirements.

Table 2. Overview of auxiliary parts and spare parts

order number	description
XS814 	Ten Auxiliary Terminal Blocks (for distribution of signals/power). Each terminal block includes two groups with seven internally-connected push-in terminals. For pluggable I/O modules, only.
XS830 	Ten Auxiliary Terminal Blocks (for distribution of signals/power). Each terminal block consists of two groups of nine internally-connected push-in terminals. For CLIOP830 and CLIOP831, only.
XS831 	Ten Auxiliary Terminal Blocks (for connection of 0...20 mA signals). Each terminal block consists of two groups of four pairs of push-in terminals (each with a 499Ω resistor to GND) for supporting up to eight current inputs. For CLIOP830A and CLIOP831A, only.
XS815 	20 Cross-Connectors for connection of six relay commons. One Cross-Connector is included in the Terminal Socket package. For pluggable I/O modules, only.
XS816 	10 Bridge Connectors. One Bridge Connector is included in the Terminal Socket package.
XAL10 	10 Swivel Labels (for attaching the application-specific label printed with CARE / COACH AX / COACH NX). One Swivel Label is included in the Terminal Socket package.
XAL11 	10 Swivel Label Holders for Mixed I/O modules. One Swivel Label Holder is included in each mixed I/O module package. For mixed I/O modules, only. NOTE: Phased out.

NOTE: The inputs and outputs of all CentraLine analog and binary I/O modules are protected against short circuit, 24 VAC +20%, and 40 VDC.
 In the case of the relay outputs of other CentraLine I/O modules (i.e., relay output modules, floating output modules, and mixed I/O modules), appropriate fusing must be provided to ensure that permissible load currents are not exceeded. See also sub-section "Features" in section "Relay Output Modules" (pg. 15), "Floating Output Module" (pg. 18), and "Mixed I/O Modules" (pg. 20).

Manual Overrides as per EN ISO 16484-2:2004

The manual override switches and potentiometers of the output modules (...R822A, ...R824 A, and CLIOPR825A) support direct operation as per EN ISO 16484-2:2004, section 5.4.3 "Local Priority Override/Indicating Units." Specifically, the positions of the manual override switches and potentiometers directly control the outputs – independently of the controller and HMI. When a manual override switch or potentiometer is not in its default position ("auto"), the corresponding output LED will blink continuously, and the output module will send a feedback signal with the status "manual override" and the given override position to the controller (which will then also store this information in its alarm memory).

NOTE: When updating the firmware of output modules, their outputs are turned OFF – regardless of the position of their manual override switches and/or potentiometers.

- 2 Cable (power, Panel Bus) connection from controller to Panel Bus I/O Modules
- 3 Swivel label holder
- 4 Cable connection between Panel Bus I/O Modules on separate DIN rails
- 5 Bridge connectors between Panel Bus I/O Modules on same DIN rail
- 6 Stopper (from 3rd-party supplier)
- 7 Auxiliary terminal packages

LEDs

Each CentraLine Panel Bus I/O Module is equipped with:

- one green power LED
- one yellow service LED

Overvoltage Protection

The inputs and outputs of all CentraLine analog and binary I/O modules are protected against short circuit, 24 VAC +20%, and 40 VDC.

In the case of the relay outputs of other CentraLine I/O modules (i.e., relay output modules, floating output modules, and mixed I/O modules), appropriate fusing must be provided to ensure that permissible load currents are not exceeded. See also sub-section "Features" in section "Relay Output Modules" (pg. 15), "Floating Output Module" (pg. 18), and "Mixed I/O Modules" (pg. 20).

Service LED

Each Panel Bus I/O Module is equipped with a yellow service LED (status: yellow/OFF) for easy diagnosis of failures.

Microprocessor

Each Panel Bus I/O Module is equipped with its own microprocessor.

Addressing

Addressing is performed using the HEX switch.

Features

- 0...11 VDC, +/-1 mA
- Floating actuator (requires MCD3)
- Binary output (0 V / 10 V)
- red LED per output (brightness according to signal level)
- Optional versions with manual override potentiometers (Auto, 0...100%; LED flashes in override mode)
- Feedback on manual override signal
- 8-bit resolution
- Configurable safety position for outputs in case of communication problems (remain, 0%, 50%, 100%)

Approvals, Certifications, and Standards

Approvals and Certifications

- CE-approved
- Conforms to EN 60730-1 and EN 60730-2-9
- Investigated according to United States Standard UL916 (USL-listed) as well as according to Canadian National Standard(s) C22.2 (CNL-listed)

Classification according to EN60730-1

Environmental conditions: For use in home (residential, commercial, and light-industrial) environments
 Pollution degree: Class 2
 Protection against shock: Class II
 Software class: Class A
 Overvoltage category: II

Classification according to EN60529

(Degree of Protection Provided by Enclosures)
 Classification: IP20

Ambient Environmental Limits

Operating temperature: 0 ... +50 °C at 5...93% r.H.
 Storage temperature: -20 ... +70 °C at 5...93% r.H.
 Humidity: 5 ... 93% r.h. non-condensing

Current Requirement and Heat Dissipation

The Panel Bus I/O Modules are equipped with highly-efficient switching power supplies which provide for relatively uniform power consumption over a wide range of supply voltages (see Table 8). The specific heat dissipation inside the modules amounts to less than 2 W for all models.

Table 8. Current requirements of Centraline Panel Bus I/O Modules

devices powered	supply voltage	
	24 VAC	24 VDC
CLIOP821A	130 mA	80 mA
CLIOP822A, CLIOPR822A	150 mA	90 mA
CLIOP823A, CLIOL823A	180 mA	130 mA
CLIOP824A, CLIOPR824A, CLIOPR825A	140 mA	80 mA
CLIOP830A, CLIOP831A	200 mA	95 mA

Mechanical

Housing dimensions (H x W x D)

The pluggable CentraLine I/O Modules (mounted on Terminal Sockets) all have the dimensions: 110 X 90 X 93 mm (see also Fig. 34 on page 25).

The CLIOP830A mixed Panel Bus I/O module has the dimensions: 216 X 110 X 93 mm (see also Fig. 35 on page 25).

The CLIOP831A mixed Panel Bus I/O module has the dimensions: 216 X 110 X 61 mm (see also Fig. 36 on page 26).

Housing Material

Plastic, flame-retardant

Mounting Methods

DIN-rail mounting (e.g. in control cabinet).

Calculated Lifetime of Weakest Components

MTBF ≥ 13.7 years (under typical operating conditions)

Sensor Characteristics

The following sensor characteristics do not include failures due to:

- sensor failures;
- wiring resistance or wiring failures;
- misreadings due to a meter connected to measure resistance or voltage at the input.

For more-detailed values, see section "Appendix 3: Sensor Characteristics" of the CentraLine I/O Modules – Installation & Commissioning Instructions (EN1Z-0973GE51).
